Forecast for Wednesday 17 May 2023

Weather: A generally fine and dry morning with high cloud making sunshine hazy. Thicker cloud pushing in from the west during the afternoon with outbreaks of rain following behind in the north into the evening. Winds picking up in association with the rain.

Chance of cloud-free hill tops above 800m: 90% becoming 40% in the north later in the afternoon.

Low Cloud and visibility: Good visibility, perhaps temporarily dropping to moderate in rain in the north later in the day. Scattered low cloud pushing in from the west from around mid-afternoon, mainly in the north, base 600-800m.

Met Office Aberdeen Meteorologist's View
Feeling cold at height despite the pleasant temperatures at lower levels.

Forecast for Thursday 18 May 2023
Weather: Cloudy with patchy light rain through much of the day, best of the brighter conditions in the south during the morning. Generally clearing to the east during the evening to leave a dry and bright end to the day.

Maximum wind: Southwesterly 10-15 mph gusting 25 mph, easing late afternoon.

Chance of cloud-free hill tops above 800m: 40% in the north and 70% in the south at first, decreasing to 30% by around lunchtime, improving to 90% into the evening.

Low Cloud and visibility: Scattered low cloud in the north at first, base 500-700m, becoming widespread across the region by early afternoon, clearing into the evening. Visibility temporarily reducing to moderate in rain.

Temperature: **Glens:** Plus 10 rising to plus 14 Celsius.
At 800m: Plus 3 rising to plus 7 Celsius.
Freezing level: Above summits.
